

Daniel Cruz Paredes

San Pedro Sula, Cortés, Honduras • danielcparedes@hotmail.com • +504 9974-6754 • github.com/dcruzparedes

Education

Universidad Tecnológica Centroamericana (UNITEC)

Computer Systems Engineering

Professional internship: expected Q2 2027

San Pedro Sula, Honduras

Expected Graduation: December 2027

Experience

Corporación MIDAS — Proposal Generator (midas_app)

San Pedro Sula, Honduras

DevOps / CI-CD Engineer

July 2026 – Present (ongoing maintenance)

- As a community outreach project for the DevOps course, designed and implemented, with a teammate, a CI/CD pipeline using GitHub Actions on a self-hosted ARM64 runner, building a two-stage Docker image and publishing it to Docker Hub on every push to the main branch.
- Configured continuous deployment via Portainer webhooks, enabling automatic production stack updates with no manual intervention.
- Orchestrated an 8-service stack (Frappe, MariaDB, Redis, Nginx, workers) with Docker Compose, managing startup dependencies and data persistence via volumes.
- Managed credentials and sensitive configuration through GitHub secrets and Portainer environment variables, keeping sensitive data out of the repository.

Universidad Tecnológica Centroamericana (UNITEC)

San Pedro Sula, Honduras

Support Scholarship Intern — FI Lab Coordination

July 2026 – Early 2027

- Maintain, update, and modify existing department web pages and applications, built in React.
- Develop new web pages and applications in React based on the department's requests.

Corporación MIDAS — Academic Project, Web Development Course

San Pedro Sula, Honduras

Full-Stack Developer, Product Owner & Scrum Master

April 2026 – June 2026 (ongoing maintenance)

- Developed, alongside a 4-person team, a full-stack corporate website and admin panel for an electrical engineering and solar energy company, using Next.js, NestJS, Prisma, PostgreSQL, and Supabase.
- Implemented a Kanban-based project planning system for internal team task management.
- Built a solar energy quotation calculator to generate automatic budgets for clients.
- Decoupled architecture via an admin panel (CMS) to control and update the site's public information without modifying the source code.

ExTra: Expense Tracker — Personal Project

San Pedro Sula, Honduras

Android Developer

March 2026 – Present

- Independently developed an Android expense-tracking app using Kotlin, Room, and View Binding.
- Independently designed a many-to-many relationship between expenses and categories in the local Room database.
- Implemented a Quick Settings Tile that opens a floating popup for quick expense logging, using a DialogFragment over a transparent Activity.
- Configured English/Spanish localization to broaden the app's accessibility.

Casa David — Academic Project, User Experience Course

San Pedro Sula, Honduras

Development Contributor

April 2024 – June 2024

- Continued and completed, as part of a team, a web platform initiated by a previous group for Casa David, a Honduran nonprofit providing lodging, meals, and comprehensive support to low-income patients and families.
- Contributed to features for patient lodging, bed assignment, and management of the foundation's operational logistics.

Leadership & Activities

Matia's Corner — Academic Project (E-commerce for a Toy Store)

San Pedro Sula, Honduras

Scrum Master & Team Lead

January 2025 – July 2025

- Led a 4-person team applying the Scrum methodology, simultaneously serving as Scrum Master and team lead, while also actively contributing to the platform's development.
- Managed the backlog and sprint planning using Trello for the development of an e-commerce platform.
